

# Guest House Booking Website

## OBJECTIVE (BUSINESS REQUIREMENT):

The Online Guest House Booking System will provide rental services of guest houses. Details of various guest houses will be posted and interested people would be able to book them. Online paying facility would also be available.

## REQUIREMENTS:

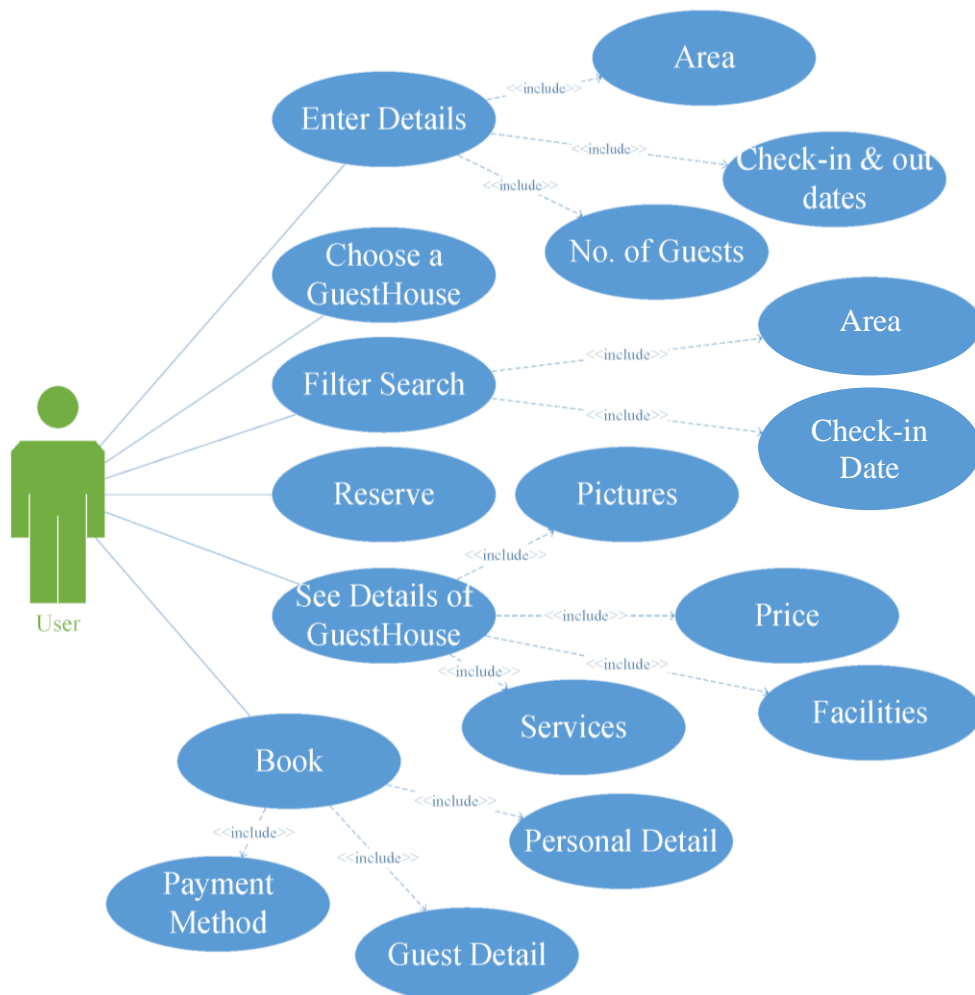

### **Clients (People who will book guest houses):**

- To search for guest houses as per their need. Search could be based upon rent, number of rooms, area/location of guest house.
- To view the details of each guesthouse that is their Policies, Facilities, Interior etc.
- To send their request to admin of the website in order to book the guest house.
- To enter their credentials before they can reserve the guesthouse.
- To be able to pay with different sources.

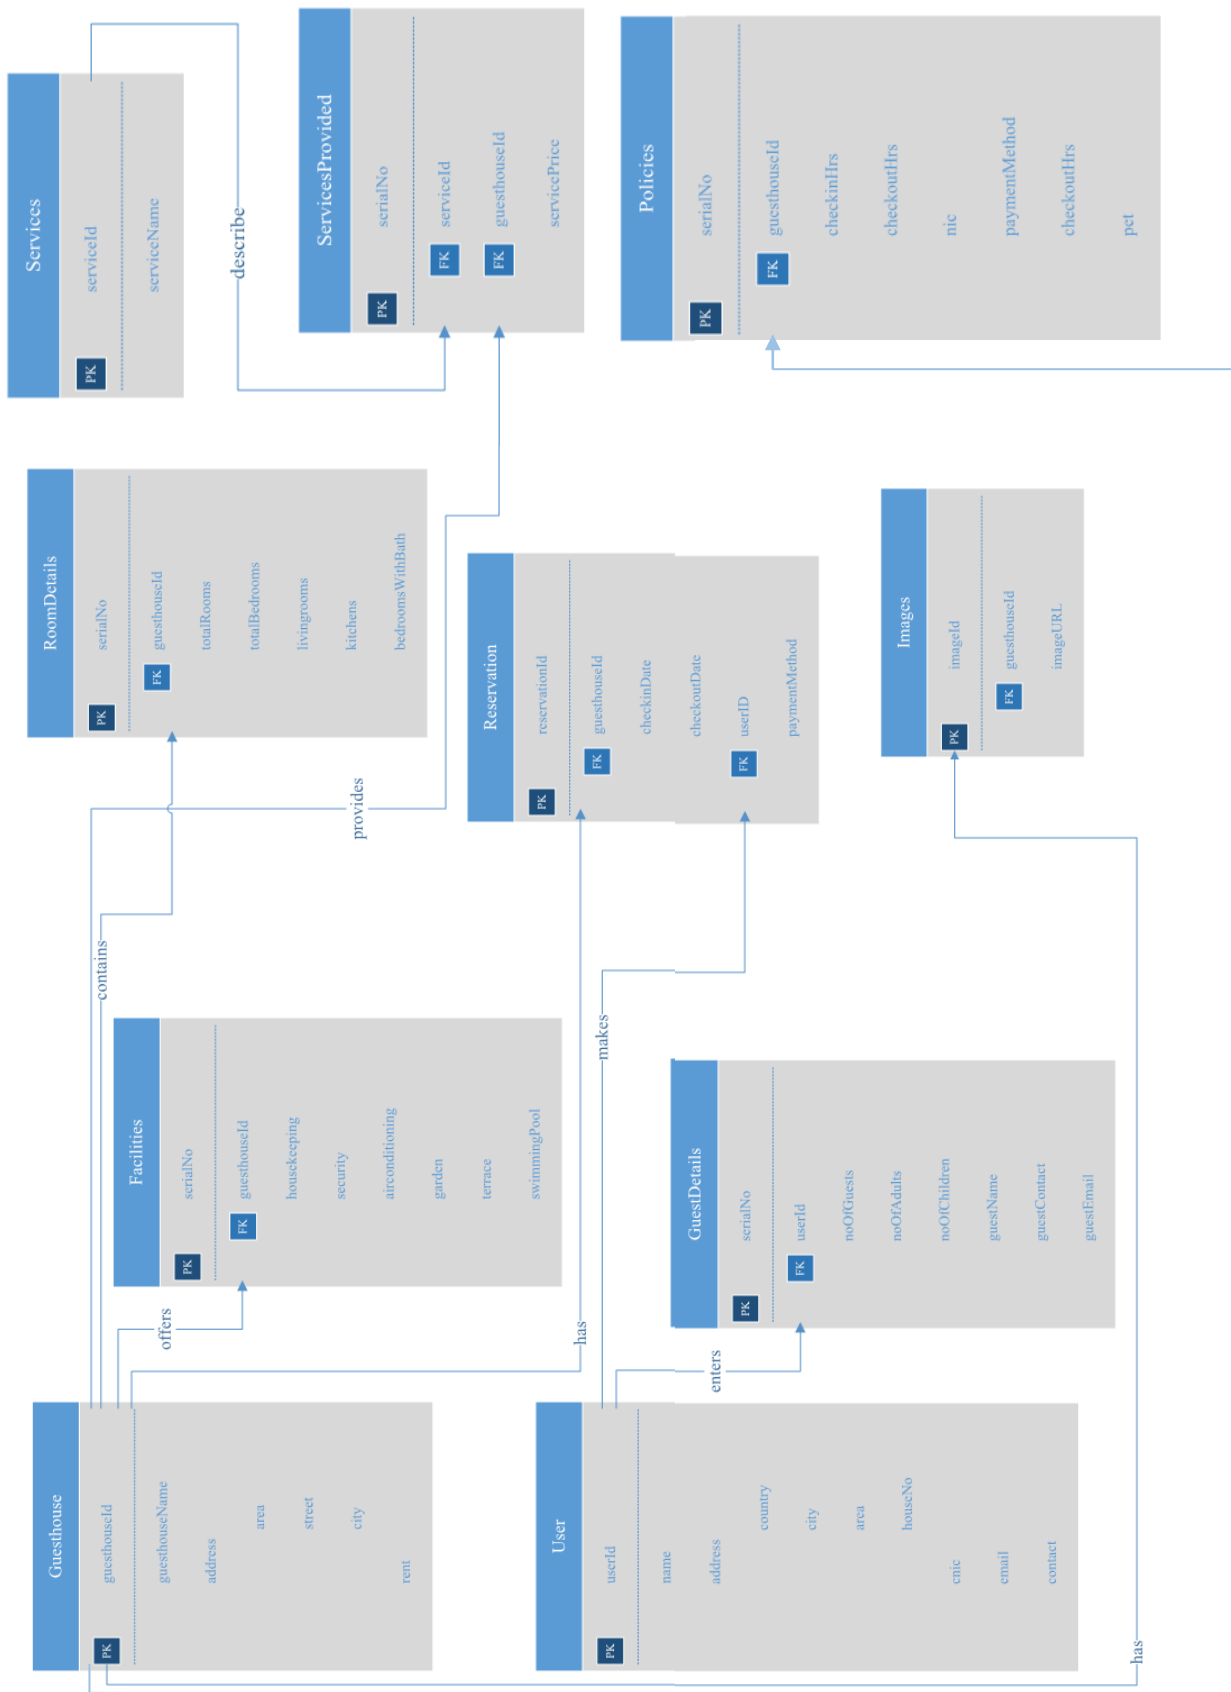

## MODELLING:

This phase contains the Use Case Diagram and Entity Relationship Diagram for the website.
